RESULTS ANNOUNCEMENT
FOR THE HALF-YEAR ENDED 30 JUNE 2007

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising from the emerging nature of companies listed on GEM and the business sectors of countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

The principal means of information dissemination on GEM is publication on the internet website operated by the Stock Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to-date information on GEM-listed issuers.

The Stock Exchange takes no responsibility for the contents of this announcement, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss however arising from or in reliance upon the whole or any part of the contents of this announcement.

This announcement, for which the directors (the “Directors”) of Shanghai Fudan Microelectronics Company Limited (the “Company”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the GEM of The Stock Exchange for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief:– (1) the information contained in announcement is accurate and complete in all material respects and not misleading; (2) there are no other matters the omission of which would make any statement in announcement misleading; and (3) all opinions expressed in this announcement have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

For the half-year ended 30 June 2007, the Group recorded a turnover of approximately RMB153,698,000 (30 June 2006: RMB110,388,000), an increase of approximately 39% as compared to the same period in last year. Profit attributable to shareholders amounted to approximately RMB19,711,000 (30 June 2006: RMB4,609,000).

During the period, the market share of the Group's IC products continued to increase and the sales of the core business products of IC card chips kept with satisfactory growth. The increase in turnover was resulted from the widening applications of IC card chips with the market expansion in multi-fee power control meters and increasing sales of multi-media IC chips. With regard to other product categories, other than sales in communication electronics products dropped due to keen market competition, the sales of motor and automobile electronics products could still record a slightly growth.

The Group's overall products recorded an increase in gross profit margin from 25.5% of the same period in last year to 28.5% in the current period. The reason for such an increase in gross profit margin was because selling prices of some new products recently launched into market were satisfactory. At the same time, selling prices of certain products have been adjusted with a view to increase their market shares and to maintain sales level.

During the period under review, other revenue and gains increased as there were written back and reversal of provisions in doubtful debts and obsolete inventories. Selling and distribution costs and administrative expenses slightly increased as a result of raise in turnover. Other operating expenses decreased was due to government grants of RMB6,500,000 received during the period and have been deducted from the research and development costs to which they relate.

FINANCIAL REVIEW

As at 30 June 2007, net assets of the Group amounted to approximately RMB276,519,000 (31 December 2006: RMB259,458,000). Current assets amounted to approximately RMB278,486,000 (31 December 2006: RMB265,700,000), of which approximately RMB153,055,000 (31 December 2006: RMB143,006,000) were cash and bank deposits. The Group has sufficient financial resources and is able to meet its daily operations and future development.
