Notes:

1. BASIS OF PREPARATION AND ACCOUNTING POLICIES

These financial statements have been prepared in compliance with Hong Kong Accounting Standard 34 “Interim Financial Reporting” issued by the Hong Kong Institute of Certified Public Accountants and Appendix 16 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the “Listing Rules”). They have been prepared under the historical cost convention. These financial statements are presented in Renminbi (“RMB”) and all values are rounded to the nearest thousand except when otherwise indicated.

The accounting policies adopted in preparing these unaudited consolidated financial statements are consistent with those followed in the preparation of the Group’s financial statements for the year ended 31 December 2016. The Group has adopted the new and revised Hong Kong Financial Reporting Standards which are effective for the financial year beginning on or after 1 January 2017. The adoption of these new and revised standards did not have any significant impact on the operating results and financial position of the Group.

All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

2. REVENUE, OTHER INCOME AND GAINS

Revenue, which is also the Group’s turnover, represents the net invoiced value of goods sold, after allowance for returns and trade discounts and the value of services rendered.

An analysis of revenue, other income and gains is as follows:

The Board does not recommend the payment of an interim dividend for the half-year ended 30 June 2017 (2016: nil).

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

During the first half of 2017, the PRC's economic growth was decelerated, the domestic market of IC products still kept a high demand, however, the competition was getting fierce. During the period, as sales of some products were satisfactory which brought the Group with an approximately 22.00% increase in sales and service income. Suffered from price competition within the industry and price cut by overseas suppliers fighting for market share, the Group's profit margin decreased from 53.82% of corresponding period in last year to 48.30% as a result of price adjustments in the Group's products. The Security and Identification IC Chips, which represents the largest proportion of the Group's sales, still maintained a satisfactory sales growth. The smart card chips with applications under old projects like public transportation cards, citizen cards and residential cards have recorded a reduction in sales due to market saturation, however, sales will be continuing. The financial card chips have been widely adopted by numerous banks with very satisfactory rate of winning bids, the sales during the period have rapidly increased and made a good contribution to the total sales growth. Taking the advantage of the upsurge of electronic payments, the sales of contactless write and readable chips were considerably. The sales of Smart Meter ASIC Chips continued to drop not only because of violent competition and market saturation, but also suffered from the decreases in tenders of the State Grid and procurement quantity. Because of the sales of electrically erasable programmable read-only memory ("EEPROM") and NOR flash memory products have greatly increased during the period, the Non-volatile Memory Chips product category has recorded a satisfactorily increase in sales. The sales of Specific Analog Circuits have recorded a slightly decrease; since it shares a small portion of the total sales, there was small impact to the overall results. Certain products under application-specific projects that the Group has been putting substantial research and development resources, have been launched in the market during the period and recorded with times increase in sales over the same period in previous year. Moreover, testing services for IC products maintained growth at around 17.60%, and revenue from both internal and external testing services increased accordingly.

FINANCIAL REVIEW

For the half-year ended 30 June 2017, the Group recorded a turnover of approximately RMB589,379,000 (30 June 2016: RMB483,105,000), an increase of approximately 22.00% as compared to the same period last year. Profit attributable to owners of the parent amounted to approximately RMB104,159,000 (30 June 2016: RMB84,706,000), an increase of approximately 22.97% over the same period of last year. The gross profit margin of overall products decreased from 53.82% of the same period in last year to 48.30%.

As compared to the same period in last year, other income and gains for the period have a significant increase of approximately RMB10,082,000 or 24.03%, it is because more interest income was received due to increase in bank deposits. In addition, the sharp increase in other government grants amounted to approximately RMB13,703,000 has setting off the drop in government grants received for research activities of RMB7,290,000.

Selling and distribution costs, administrative expenses and other expenses have increased during period in accordance with increase in sales. The provision for doubtful debts during the period amounted to approximately RMB3,133,000 and there was a reversal of approximately RMB8,925,000 in the corresponding period of last year. Payments under operating leases in respect of land and buildings increase as more working spaces were needed.

The tax charge for the period increased substantially by approximately RMB8,672,000 as the Company, with consent of the relevant tax bureau during the period, was allowed to file its income tax for the financial year ending 31 December 2017 at the preferential tax rate of 10% on its assessable income. The related tax adjustment on deferred tax assets under the current tax rate amounted to approximately RMB10,344,000 was accounted for in the current period.

As at 30 June 2017, net assets of the Group amounted to approximately RMB1,472,325,000 (31 December 2016: RMB1,374,432,000), increased by approximately 7.12%. Non-current assets amounted to RMB495,642,000 (31 December 2016: RMB491,221,000), the increase was due to decreases in amortization and impairment of intangible assets over the last corresponding period and there was also an increase in acquisition of plant and equipment. Current assets amounted to approximately RMB1,311,675,000 (31 December 2016: RMB1,311,647,000), which was almost the same as last corresponding period. Out of which, inventories increased to cope with sales need; trade receivables dropped as recoveries were satisfactorily; as the Company was qualified as “key software enterprise falling within the State’s planned arrangement”, the difference between the income tax prepaid in prior year and the current period at income tax rate of 15% and the preferential rate of 10% will be refunded; cash and bank deposits dropped in accordance with business operations. The Group still keeps sufficient liquidity and is able to meet its daily operations and future development.

The Group’s current liabilities as at 30 June 2017 amounted to approximately RMB331,996,000 (31 December 2016: RMB416,358,000), a decrease of approximately 20.26% over the same period in last year. Trade payables increased as a result of increase in purchases, however, deferred income decreased due to completion of government projects and no tax provision was made because the Company will have tax refund as it was qualified for enjoying a preferential tax rate during the period. Non-current liabilities amounted to approximately RMB2,996,000 (31 December 2016: RMB12,078,000) and the substantial decrease over the last corresponding period was mainly because of some projects under government grants have completed and recognised during the period.

The net assets value per share was approximately RMB2.38 (31 December 2016: RMB2.23), an increase of 6.73%. The Group’s current ratio of total current liabilities over total current assets was approximately 25.31% (31 December 2016: 31.74%) and the gearing ratio was approximately 22.75% (31 December 2016: 31.17%) on the basis of total liabilities over net assets.

The Group manages its capital structure and makes adjustments to it in light of business development and changes in economic conditions. During the half year ended 30 June 2017, the Group had a net inflow of cash and cash equivalents of approximately RMB32,091,000 (30 June 2016: RMB203,422,000), a substantial decrease over the same period in last year. It was because of the increase in inventories and prepaid income tax, and also with the decreases in other payables, accruals and deferred income. The net cash and cash equivalents at the period end was approximately 318,131,000 (30 June 2016: RMB324,970,000), a decrease of RMB6,839,000. As at 30 June 2017, the Group had no bank or other borrowings (31 December 2016: nil).

The Directors believe that the Group is not exposed to any material interest rate risk in view that the Group does not have any debt obligations that are subject to fluctuations in market interest rates. The Group has transactional currency exposures arise from sales or purchases by operating units in currencies other than the units' functional currency. The Group keeps monetary items in foreign currencies at a certain level in order to meet the needs of purchases that are denominated in the foreign currencies. It is the Group's policy not to enter into forward contracts until a firm commitment is in place. During the reporting period, the fluctuations in foreign exchange have no material effect on the Group's operations and cash flows.

As the Group trades only with recognised and creditworthy third parties, there is no requirement for collateral. During the period, the Group has certain concentrations of credit risk as the Group's sales are made to several major customers. The Group seeks to maintain strict control over its outstanding receivables and closely monitor the collection to minimize credit risk. The credit risk of the Group's other financial assets, which comprise cash and cash equivalents, deposits and other receivables, arises from default of the counterparty, with a maximum exposure equal to the carrying amounts of these instruments.

During the period, the Group did not have other significant investments, material acquisitions or disposals of subsidiaries.

During the period, the capital structure of the Company has no change and only comprises of ordinary shares. The Group relies on its internal resources and profits as a source of funding and keeps most of its cash in Renminbi in bank accounts as working capital.

As at 30 June 2017, the Group has capital commitments in respect of acquisition of property, plant, equipment and intangible assets amounted to RMB11,922,000 (31 December 2016: RMB7,637,000) and has operating leases commitments amounted to RMB21,889,000 (31 December 2016: RMB22,005,000) and did not have any material contingent liabilities (31 December 2016: nil). The Group has not pledged its assets to any third parties (31 December 2016: nil).

EMPLOYEE INFORMATION

As at 30 June 2017, the Group employed approximately 1,045 (30 June 2016: 973) staff and the total staff costs reflected in the unaudited condensed consolidated statement of profit and loss amounted to RMB110,101,000 (30 June 2016: RMB107,564,000). The increase in staff costs was mainly due to increase in staff for business development and the increment of staff remuneration to be in line with salary level within the industry.

PROSPECTS

As for the outlook of the second half year of 2017, it is expected that the sales of major products like Security and Identification IC chips and Non-volatile Memory products will maintain their steady sales. The testing services for IC products are expected to have a continuing growth as well. Due to increasing keen competition within the industry, it is expected that product prices will have an adverse impact and under severe pressure that will affect gross profit margin as well as the overall results performance. The Group will continue to strive for research and development and actively explore overseas markets. The Directors expect that the Group would achieve a steady growth in its results in the second half year.
